

OMEICOS Therapeutics GmbH as a clinical-stage biotech company is developing oral, first-in-class, small molecules for the prevention and treatment of cardiovascular and ophthalmic diseases. OMEICOS exciting platform technology is based on proprietary synthetic analogues of omega-3 fatty acid metabolites, exerting immunomodulatory effects in ophthalmic and other chronic inflammatory disease models.

As a young and ambitious team we are looking for a

Head of Immunomodulation (m/f)

Your responsibilities:

- Planning and conducting internal immunological studies
- Design and coordination of external immunological research
- Presentation of results for internal meetings as well as congresses

Your profile:

- PhD or MD with immunological focus
- Passion for the performance of in-vitro as well as in-vivo experiments
- Excellent knowledge of immunological cell types and inflammatory signaling pathways
- Experience in immunological and molecular research techniques
- Excellent communication and organizational skills
- Assertiveness and high social competence
- Very good command of spoken and written English
- Very good knowledge of MS Office

OMEICOS offers:

As part of our team you will participate in the exciting journey of a dynamic company. A positive corporate culture with an open-minded working environment offers i.a. the freedom to work independently and various opportunities for further training and continuing education. Full-time or part-time employment, initially limited to one year with the prospect of permanent employment.

Your application:

If you are looking for a new career challenge and a future-oriented role, then we are looking forward to receive your application including your earliest possible starting date and salary expectations.

Please send your application exclusively via email to the attention of Dr. Robert Fischer,
info@omeicos.com.

Earliest entry date: 01.01.2019
